

Trojan Technologies Announces Acquisition of Salsnes Filter AS

LONDON, CANADA – December 27, 2011 – An agreement has been signed under which [Salsnes Filter AS](#) of Namsos, Norway will join the Trojan Technologies group of businesses. The agreement is subject to regulatory approval.

Salsnes Filter's patented filter technology removes particles from municipal and industrial process water. Industries such as food, paper, cruise lines and aquaculture use the fully-automated treatment technology to treat effluent, improve the quality of influent or enhance the utilization of raw materials. Salsnes Filter is also an alternative to a primary settling stage for a traditional chemical/biological treatment facility or preventing membrane bioreactor (MBR) fouling. Salsnes Filter will operate as one of the Trojan Technologies group of businesses.

Founded in 1991, Salsnes Filter is represented in many countries and will continue to operate out of Namsos with production facilities in Salsnes, Norway.
